Why Automatic Watering?

What are the benefits of Automatic Watering?

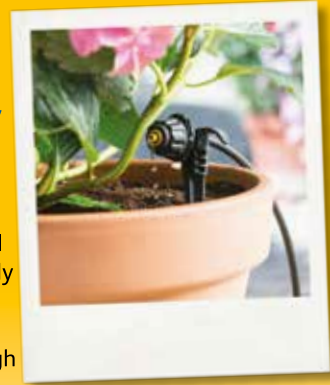

Have some time off

During the summer months your plants need an increased amount of water, requiring daily watering which can sometimes become a bit of a chore. Automatic Watering systems take this burden away meaning you have more time to do other things.

Water more efficiently

Automatic Watering systems deliver more controlled watering directly to the roots, reducing water wastage through evaporation or inaccurate watering. Not only does this save water, it could also save you money on your water bills.

See your garden bloom

So many plants are affected by both under and over watering, which can potentially kill them or make them more prone to disease. Regular controlled watering produces stronger, happier and more vibrant plants making your garden look great with less work.

Get out more

Automatic Watering systems allow you to be away from home with the assurance that your garden continues to be watered. No more bothering the neighbours and family or coming back to dead plants.

HOZELOCK

Why Easy Drip?

What are the benefits of Easy Drip?

Simply install in only 15 minutes

Setting up an Automatic Watering system has never been easier thanks to Easy Drip. Clever drippers make installation and adjustment a breeze, whilst a refined range of components ensures that selecting what you need for your outdoor space is kept simple.

Easily adapts to any outdoor space

The Easy Drip range delivers simple solutions to ultimately control, distribute and deliver water around your outdoor space. Whether to plants in containers or borders, Easy Drip can be easily adapted to your watering requirements.

Quickly adjusts to water any size plants

The Easy Drip drippers are fully adjustable allowing you to turn them off or open them to water up to 40L/H. This allows you to ensure each plant gets the right amount of water to help them thrive.

Compatible with all systems

Whether you have an existing Automatic Watering system or are looking to install one for the first time, you can be assured that there will be no issues with compatibility. Easy Drip works seamlessly with all existing systems allowing you to join or extend them together with no fuss.

HOZELOCK

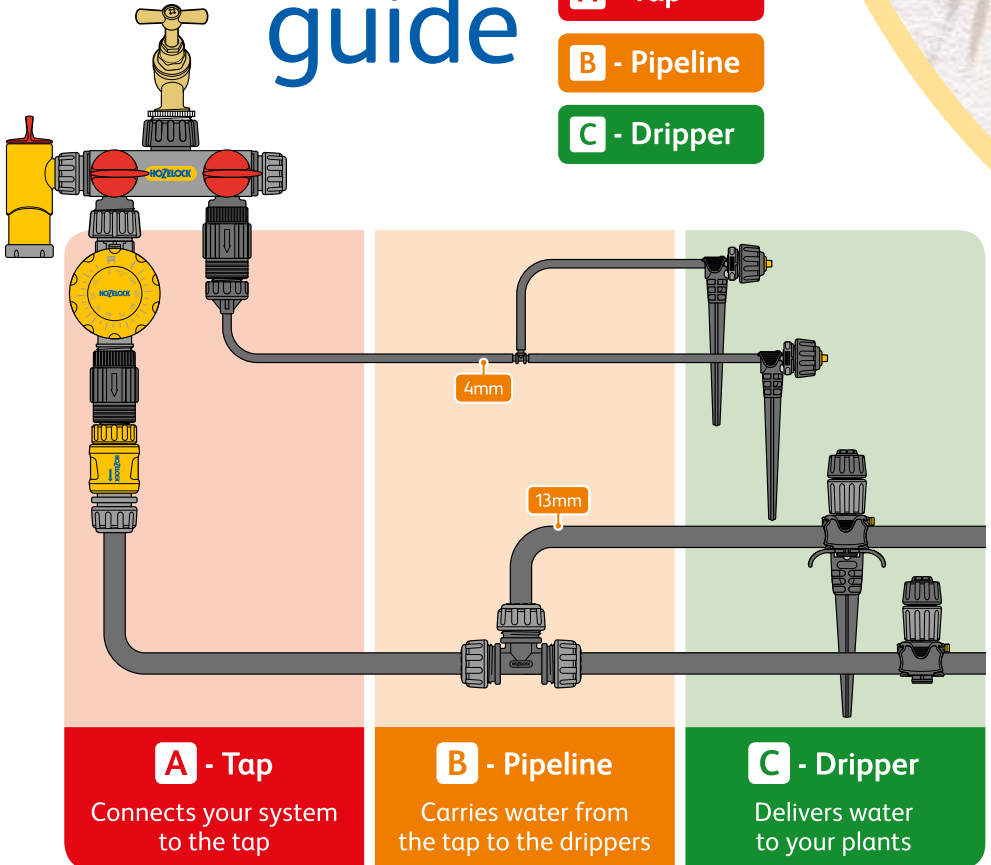

The **A B C** Automatic Watering guide

The Hozelock Automatic Watering system has been split into three easy to understand sections:

A - Tap

B - Pipeline

C - Dripper

A - Tap

The tap connection is vital. It connects the watering system to the mains water supply. Always use a Pressure Regulator to control the water pressure to ensure the best performance.

Auto Off Controller (2210)

Key benefits:

- Manually select timed watering of up to 120 minutes.
- No batteries required.
- $\frac{3}{4}$ " BSP (G $\frac{3}{4}$) and $\frac{1}{2}$ " BSP (G $\frac{1}{2}$).

Pressure Regulator (7022)

Key benefits:

- Reduces tap water pressure to 1.5bar (20psi) for optimum performance.
- $\frac{3}{4}$ " BSP (G $\frac{3}{4}$) inlet, 13mm or 4mm outlet.

A - Tap

HOZELOCK

The future of Automatic Watering

Hozelock Cloud

The mobile app (available on Apple and Android operating systems) is easy to use and allows you to remotely set, pause and adjust watering schedules. It also keeps you informed about current conditions and changes to weather.

The Hozelock Cloud includes a hub that is connected directly to an internet router and provides a secure system that is easy to set up, without any complex pairing process.

The hub links with a remote tap unit in your garden that can be positioned up to 40 metres away and each one is capable of supporting up to 4 remote taps that might be installed to control different areas of your garden.

The Hozelock Cloud provides an easy way to control your garden watering from your mobile. It doesn't matter if you are on holiday or at work – your plants will no longer need to suffer if weather conditions change

Cloud Controller (2216)

Key Benefits:

- Easy to use app to control your garden watering from your mobile (Apple or Android operating system) with Hozelock hub and remote tap unit.
- App allows you to remotely set, pause and adjust watering schedules.
- App includes a local weather summary and push notifications to keep you informed about changes to weather patterns.
- Ideal for when you are away from home and weather conditions change, to remotely pause and adjust schedules.
- Requires 2 x AA batteries and internet connection for Hozelock hub.
- Each hub can support up to 4 remote tap units.
- 1" BSP (G1), ¾" BSP (G¾) and ½" BSP (G½).

Sunrise & sunset

The best time to
water your garden

Sensor Controllers

The best time to water your garden, to avoid leaf scorch and excessive evaporation, is at sunrise or sunset, but it is not always convenient to do it yourself at these times of the day.

The Hozelock Sensor Controller range of Automatic Watering controllers will take care of this for you, as they include a daylight sensor that automatically adjusts your daily watering schedule to start at sunrise and sunset. Both units are supplied ready to use with the most popular watering schedule of twice a day for 10 minutes; simply insert batteries to get started.

There are two models available in the range, the Sensor Controller that automatically waters every day at sunrise, sunset or both sunrise and sunset. Alternatively the Sensor Controller Plus has the added functionality of selecting every day through to once a week.

Sensor Controller (2212)

Key benefits:

- Electronic water timer with daylight sensor that automatically adjusts daily watering schedule to start at sunrise and sunset.
- Waters once or twice per day for a duration ranging from 2, 5, 10, 20, 30 or 60 minutes.
- Water now function for 60 minutes.
- Requires 2 x AA batteries and includes battery check function.
- 1" BSP (G1), ¾" BSP (G¾) and ½" BSP (G½).

Sensor Controller Plus (2214)

Key benefits:

- Electronic water timer with daylight sensor that automatically adjusts daily watering schedule to start at sunrise and sunset.
- Waters once or twice per day for a duration ranging from 2, 5, 10, 20, 30 or 60 minutes.
- Adjustable watering schedules from every day to once a week.
- Water now function ranging from 10 minutes up to 60 minutes.
- Requires 2 x AA batteries and includes battery check function.
- 1" BSP (G1), ¾" BSP (G¾) and ½" BSP (G½).

to improve and adapt
your system

Sealing Clip (7014)

Seals holes in 13mm Flexi Hose when Universal Drippers are moved into a new position.

Key benefits:

- Quick and easy to use with a reliable water tight seal.
- Compatible with Hozelock 13mm Flexi Hose.
- Can be removed and re-used if required.

Adaptor Nut (7015)

Adapts the Universal Dripper to connect to both 4mm hose and existing Automatic Watering drippers.

Key benefits:

- Allows for the connection of both Hozelock and 3rd party drippers to the Universal Dripper, ensuring complete compatibility.
- Easy to install providing a quick and water tight connection.
- Can be removed and re-used if required.

Peg (7020)

An innovative ground Peg that can be used to position Universal and Micro Drippers, 13mm and 4mm hose exactly where you need them.

Key benefits:

- Compatible with 13mm & 4mm supply hoses.
- Enables the Universal and Micro Drippers to be positioned exactly how you want them, providing targeted watering for your garden.
- Can be removed and re-used if required.

B - Pipeline

HOZELOCK

Easy-to-install Universal Dripper

Ideal for watering
borders, hedges and
vegetable patches

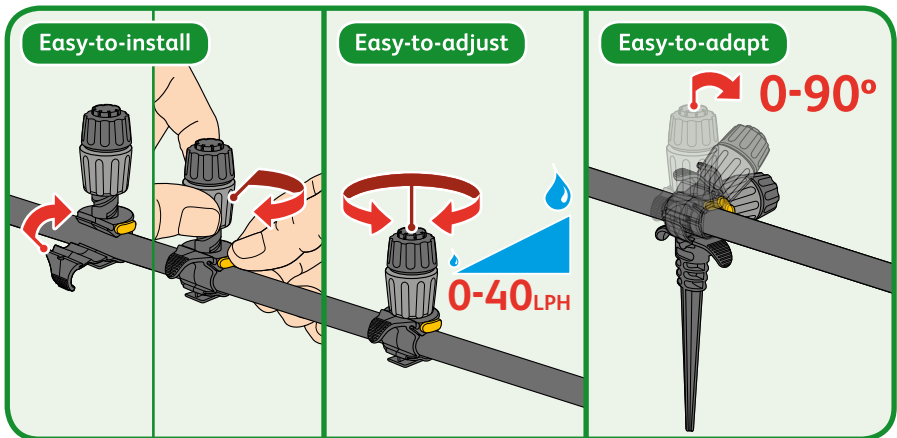

Universal Dripper (7010)

Key benefits:

- The cleverly engineered design allows for a safe and smooth piercing of the hose for an easy, water tight installation.
- Water flow can be regulated from 0 to 40 litres per hour giving you complete control of water delivery to your plants.
- Each dripper can water up to 100cm in diameter providing extensive coverage.
- Compatible with 13mm Flexi Hose.
- Supplied with an innovative ground peg for easy positioning and angle selection from 0 to 90 degrees.
- Easily move and re-position drippers as your garden changes.

 - Dripper

HOZELOCK

Easy-to-install Micro Dripper

Ideal for watering pots,
containers and
hanging baskets

Micro Dripper (7012)

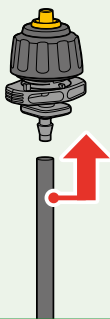

Key benefits:

- Easy-to-install end of line dripper compatible with 4mm Micro Hose.
- Regulate the water flow from 0 to 20 litres per hour giving you complete control of water delivery to your plants.
- Supplied with an innovative ground peg for easy positioning and angle selection from 0 to 90 degrees.
- Compact design for discreet installation.

“I would like to water pots and containers”

Container plants are great for decorating patios, windows and hard standing areas. However, maintaining potted plants requires regular watering otherwise the plants will dry out and die.

The solution:

Easy Drip Micro Kit (7024)

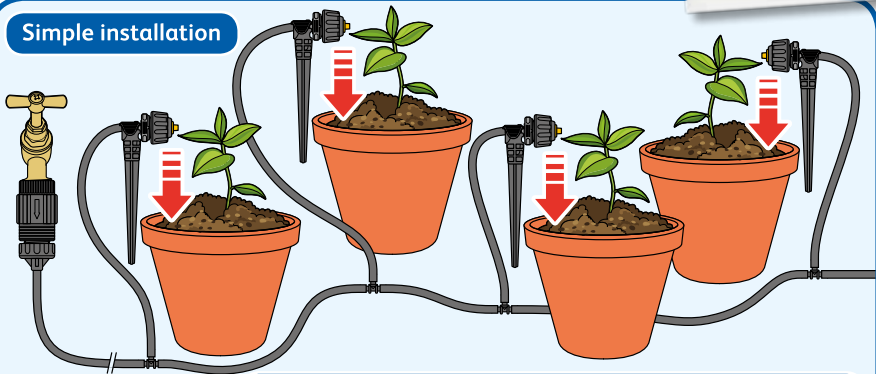

- The Easy Drip Micro Kit is quick and simple to install, providing a discreet solution to keeping your containers well watered.
- The Micro Kit is completely adaptable, so if you change the location of your pots or move house, your Easy Drip system can simply be moved with them.
- Each Micro Dripper is completely adjustable, allowing you to control the amount of water each container receives.

“I would like to water hanging baskets”

Hanging baskets can look beautiful and really help to decorate your home. However, they are often difficult to reach and are one of the hardest things to keep looking good all summer.

The solution:

Easy Drip Micro Kit (7024)

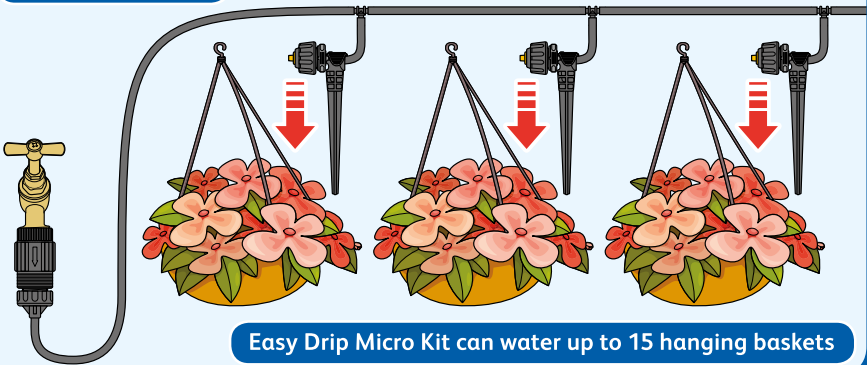

- The Easy Drip Micro Kit ensures your hanging baskets can be watered regularly without the need to stretch or potentially soak yourself.
- The Micro hose and drippers allow for discreet installation.
- Regulate the water flow from 0 to 20 litres per hour giving you complete control of water delivery to your plants.

HOZELOCK

“I would like to water a vegetable garden”

Growing your own vegetables is great because you get the satisfaction from both growing and then eating your own crop. Delivering water direct to the roots, where it is needed most, can be difficult as the water often sprays onto the leaves and foliage, resulting in a large amount of water evaporating into the air.

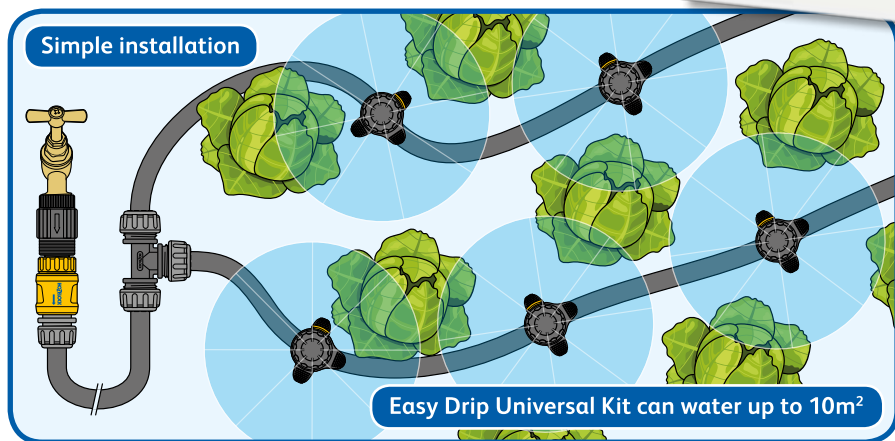

The solution:

Easy Drip Universal Kit (7023)

- Installing an Easy Drip Universal Kit will allow you to target water delivery to the plant's roots, ensuring that your plants are effectively watered with minimal water evaporation.
- The kit allows you to water an area of up to 10m² but can be combined with other kits to cover a larger area.
- As your vegetable garden evolves throughout the season, you can simply reposition the Flexi Hose and Universal Drippers to meet your needs.
